

INVITATION

TERRAFINO OPEN DAY & PARTY

SATURDAY, 19th SEPTEMBER 2009 IS THE DAY.

After a year of hard work and renovation, it is time! On Saturday, 19th September we – Tierrafino BV and Leembouw Nederland Carl Giskes vof – will celebrate the festive opening of our new premises. During the day, there will be a variety of activities, culminating in a party in the evening. It will come as no surprise to you that this opening will be inspired by ecology and sustainability.

DEMONSTRATIONS AND PRESENTATIONS

From 10 am, users of Tierrafino will demonstrate how they employ our material and will exhibit the remarkable results. From 1 pm, artists and architects will give presentations on a range of completed projects. Carl Giskes, inventor of the coloured clayloam finish, will explain how he has introduced the application of clayloam to modern architecture in The Netherlands, as well as how he developed and expanded the Tierrafino product line between 1992 and 2009.

CLEANER WATER TRANSPORT

At 11 am, the brigantine 'Tres Hombres' will moor opposite our building. It is a sailing cargo ship on its way to deliver its first load, Tierrafino Clay, to France. The foundation introducing this ship into service is working on large-scale sailing cargo transport and towards launching an entire fleet of innovative eco liners. This ecological and fair mode of transport is wholly in tune with the ideas and ambitions of Tierrafino. On the grounds opposite our premises, there will be an outdoor exhibition about cleaner water transport inspired by fair trade and fair transport.

PARTY!

Together with you, our customers, our business contacts and everyone else who has enthusiastically contributed to the realisation of this project (production, wholesale, office and educational activities under one roof), we would like to conclude this opening with a party. From 7 pm there will be plenty of food, drink and music.

Please let us know whether you will attend the party at: opening@tierrafino.com

WELCOME!
